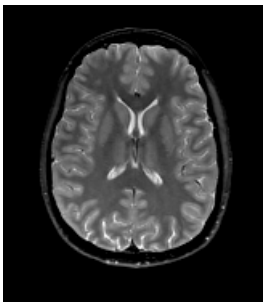
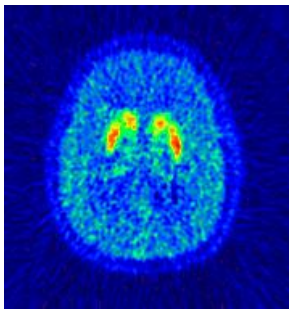
Are you taking prescription opioids?
Volunteers wanted for a Brain Imaging Research Study





Researchers at CAMH are conducting a PET (positron emission tomography) imaging study to help us understand opioid addiction.

This study involves a screening phone call, an assessment visit, one or two scan days involving 1 MRI and 1 PET scan with blood draws and cognitive tests.

To be eligible, volunteers must meet the following criteria:

- Be 18 years of age or older
- have chronic pain conditions
- currently taking prescription opioids for chronic pain
- no unstable medical condition
- no current severe or unstable mental illness other than opioid dependence
- not pregnant / breastfeeding
- not claustrophobic
- no metal implants that could interfere with MRI
- not participated in any PET studies in the past 12 months
